

Wellington Plastics Inc.

CUSTOM TANKS

Wellington Plastics manufactures custom tanks to suit all industries right to your exact specifications in any shape or size to fit in any available space! We specialize in the fabrication of intricate, difficult or unusually shaped tanks and to assist you in creating that unique tank, they can be made from a variety of materials such as hdpe (high density polyethylene), virgin natural polypropylene, or high impact, UV stabilized copolymer polypropylene & PVC so you get the proper material required for you specific storage needs.

Wellington's tanks are cut, thermo formed and welded to fit almost any configuration as well as baffled to control water slosh and improve stability in inclement weather. This also increases the overall strength and integrity of the tank. Wellington uses state of the art injection welders and 100% compatible welding rod to ensure durability and strength of the tank and uses only heavy duty fitting machined in house which are not only friction welded but back welded for added strength and security.

With over 75 years of combined experience in plastic fabrication, wellington can not only build you the best, most versatile & durable products, we make it exactly how you want it and make it aesthetically pleasing, leaving smooth finished edges creating an almost seamless appearance.

Stringent quality control, advanced fabricating techniques, materials and equipment, and a team of trained & experienced staff is what makes us one of canada's top leaders

and innovators in plastic fabrication. Our tanks are used world-wide in the fire suppression industry building water tanks for some of the world's leading apparatus manufacturers as well as for a broad range of other industries such as agriculture, forestry, mining, aquaculture, and horticulture.

We are committed to ensuring exceptional workmanship and quality for all your custom tank applications big or small, any shape and size, turning all your ideas into reality.

We take pride in our accomplishments and build on them everyday!

Wellington Plastics Inc

WE SPECIALIZE IN CUSTOM TANK FABRICATION!

Wellington Plastics are purveyors of all shapes and sizes of rotation molded tanks but specialize in designing, fabricating and welding custom tanks. Custom tanks are cut, thermo formed and welded to fit almost any configuration and are manufactured using high impact, UV stabilized copolymer polypropylene.

FIRE SUPPRESSION INDUSTRY

Whether it's a 5 gallon foam cell, a 200 gallon skid unit, a 1,000 gallon booster tanks or a 4,000 gallon water tanker, Wellington can and will custom build a tank for your particular needs. We also fabricate custom truck storage bins, shelves, boxes and more!

For over sixteen years, Wellington Plastics has been a supplier and custom fabricator of industrial grade plastic products and materials. We custom fabricate and thermoform all sorts of ideas for one-off custom designs to small or large scale production orders, all to your exact specifications.

We not only help design products and ideas from conception to finished product but we also sell industrial grade plastic sheets, materials, & components as well as distribute a wide range of multipurpose storage tanks and related items.

Here at Wellington Plastics, our team of trained & experienced staff have mandated ourselves to manufacture the best, most versatile and durable products. Our manufacturing facilities incorporate cutting, welding, polishing, solvent cementing, and heat bending. We can also provide complete design, fabrication, and assembly of acrylic and polycarbonate products with our newly added acrylic fabrication department. Our qualified technicians can fabricate and machine any thermoplastic material available including ABS, PVC, polystyrene, polyethylene, copolymer & polypropylene, UHMW, Teflon® or nylon. Welding and patching repair services, modifications as well as sales & rentals of welding guns & accessories are also offered. We are committed to ensuring exceptional workmanship and quality for all applications big or small, any shapes and size, turning all your ideas into reality.

We take pride in our accomplishments and build on them everyday!
